IKANABASI ANIEKAN AKPAN

DATA ANALYST | DATA ENGINEER | APPLIED AI

Toronto, ON | (647)-631-1624 | ikanabasi123@gmail.com | linkedin.com/in/ikanabasiakpan | ikanabasi.github.io

PROFESSIONAL SUMMARY

Data analyst and data engineer with 2+ years of industry experience translating messy business data into reliable pipelines, SQL reporting, and decision-ready dashboards. Built a deployed FDIC banking analytics platform processing 102,983 bank-quarter records across 22 quarters using Python, AWS S3, Glue, Athena, automated validation, and Streamlit. Reduced data-processing time by 70%, automated verification of 5,000+ policies, and supported secure data access for 90+ users.

TECHNICAL SKILLS

Analytics: Python, SQL, Pandas, Power BI, advanced Excel/PivotTables, KPI dashboards, Streamlit, Plotly
Engineering: ETL/ELT, REST APIs, PostgreSQL, MySQL, SQL Server, AWS S3/Glue/Athena, Parquet, data quality
Engineering tools & AI: Git, GitHub Actions, CI/CD, pytest, SQLGlot, OpenAI API, LLMs, Playwright

PROFESSIONAL EXPERIENCE

ANCHOR INSURANCE COMPANY LTD. | ICT Officer — Data Analytics & Automation | 04/23–12/25

- Engineered Python-to-SQL ETL workflows for operational and marketing data, cutting processing time by 70% and improving reporting reliability.
- Automated Excel-to-web insurance policy verification for 5,000+ records in approximately three days; reduced manual-entry errors by 90%.
- Built SQL analyses and Power BI dashboards covering production, marketing, profitability, and recurring operational KPIs.
- Implemented reusable cleaning, validation, and transformation rules; coordinated with business stakeholders to resolve data issues.
- Managed role-based database access for 90+ staff and maintained backup, recovery, and application-support processes.
- Supported in-house insurance workflows and automation, including marine policy processing and accelerated cheque-request handling.
- Resolved 1,654 technical support tickets and supported Microsoft 365, SharePoint, Power Automate, endpoint security, and business continuity.

NOKIA NETWORKS | Data Analyst Intern | 05/21–09/21

- Analyzed 500,000+ network data points from MTN MAPS and internal sources to identify service quality and performance trends.
- Monitored latency, uptime, and network KPIs across five regions; analysis supported initiatives associated with 12% uptime improvement.
- Developed dashboard and recurring KPI reporting workflows, reducing manual reporting effort by 20%.

PROJECTS

DATAOPS SENTINEL - FDIC Banking Analytics Platform | Python, SQL, AWS, Streamlit

- Built end-to-end ingestion of official FDIC financial data: 102,983 validated bank-quarter records across 22 reporting quarters.
- Designed Bronze-Silver-Gold transformations, historical backfills, data-quality controls, and versioned SHA-256-verified dashboard snapshots.
- Implemented AWS S3 storage, Glue/Athena analytics, eight Gold monitoring views, pytest checks, and GitHub Actions CI.
- Implemented CI workflows using GitHub Actions and pytest to automatically validate pipeline changes and detect failures before deployment.
- Deployed a public Streamlit dashboard for 4,313 latest-quarter institutions, investigation priorities, and historical exploration.

SAFE TEXT-TO-SQL | Academic Research Prototype | 2026

- Built schema-aware LLM-to-SQL validation using PostgreSQL and SQLGlot; measured 73.3% validation pass and 70% execution success in a small baseline evaluation.

BANKING TRANSACTION RISK & DATA QUALITY MONITOR | Python, Pandas, PostgreSQL *(in progress)*

- Implemented reusable checks for a 100,000-row, 22-field transaction dataset, including uniqueness, numeric/date validity, and rejected-record reasons.
- Designed account/customer enrichment and risk indicators for high-IP-risk activity, anomalous amounts, channels, and international transactions.

AI NETWORKING ASSISTANT | Python, Playwright, OpenAI *(in progress)*

- Prototyped connection and activity discovery using Playwright; designed relevance ranking, tracking, and human-approved engagement flows.

EDUCATION & CERTIFICATIONS

Algoma University - MSc Computer Science, expected 12/26 | Madonna University - B.Eng. Computer Engineering, 2022 (4.48/5.00)
IBM: Python for Data Science, AI & Development; Databases and SQL for Data Science with Python
